EXPLANATORY NOTE

Article XII Section 1 of the 1987 Constitution states:

"The goals of the national economy are a more equitable distribution of opportunities, income and wealth; a sustained increase in the amount of goods and services produced by the nation for the benefit of the people; and an expanding productivity as the key to raising the quality for all, especially the underprivileged."

Consistent with and in pursuance of the aforementioned provision of the Constitution, this measure, herein otherwise referred to as the Poverty Reduction through Social Entrepreneurship (PRESENT) Act, seeks to provide the framework for the formulation, establishment and institutionalization of a program of poverty reduction through the development of a social enterprise sector with the poor as primary stakeholders. The social entrepreneurship program will play an essential role in the transformation of the poor and marginalized into self-reliant sectors through the provision of goods, services, and opportunities that empower them to participate in economic activities.

The bill seeks to realize the foregoing by giving the poor viable avenues to start social enterprises and/or improve and expand them through affordable loans, access to funds for research and development, capacity-building programs, linkage to value chain and market and insurance for social enterprises in times of calamities and disasters. These investments and reinforcements will make the poor effective entrepreneurs, suppliers, clients and/or owners of social enterprises and eventually free themselves from poverty in the process.

It is also a declared policy under this bill for the State to ensure the autonomy and organizational integrity of social enterprises are preserved to truly enable them to develop into viable and vital anti-poverty agents and a strong social entrepreneurship movement which shall be instrumental in reducing poverty in the country.

In view of the foregoing, the passage of this bill is earnestly sought.
