First Regular Session

HOUSE BILL NO. 0216

INTRODUCED BY HON. ROBERTO "ROBBIE" V. PUNO

EXPLANATORY NOTE

The State recognizes the youth's value in nation-building and thus seeks to promote and protect their physical, moral, spiritual, intellectual, and social well-being. Despite their disabilities and impairments, children and youth with disabilities are entitled to the same protection and promotion. Indeed, children and youth with disabilities have the capacity to become valuable members of society. This is, however, possible only through much needed timely assistance and intervention of the State through rehabilitation and other welfare services.

Republic Act No. 7277, otherwise known as the *Magna Carta of Disabled Persons*, declares as a State policy the importance of rehabilitation in fostering a person with disability's capability to attain a more meaningful, productive and satisfying life. But while this policy has resulted in rehabilitation centers in each provincial hospital, many poor families are still unable to avail of these services due to its high cost and lack of easily accessible facilities. At present, only cities with funds are able to provide free rehabilitation services through Simulation and Therapeutic Centers that cater specifically to children with disabilities.

This bill seeks to enhance community rehabilitation services first introduced in the *Magna Carta of Disabled Persons* by allocating funds for the establishment of rehabilitation centers in each city and municipality and satellite centers in barangays. These centers shall provide free comprehensive rehabilitation services to children and youth with disabilities.

For the aforementioned reasons, immediate passage of this bill is sought.
