EXPLANATORY NOTE

What is known as the "blue water equivalent" of the Amazon River Basin is located within Philippine Territory.

The Sulu-Sulawesi Seascape, straddling the Indo-Malaya-Philippine Archipelago, occupies an area of 900,000 sq. km. and supports about 40 Million people. This seascape is recognized as the center of the highest concentration of the marine biodiversity in the world. At the center of this area is the **Verde Passage Marine Corridor**.

The Verde Passage Marine Corridor, an approximately 100 sq. km. area of seascape which encompasses the coastal areas, islands, and marine waters within the Provinces of Batangas, Mindoro Occidental, Mindoro Oriental, Marinduque, and Romblon, is home to 1,736 overlapping marine species. **It is by far the largest concentration of marine life in the world.** The Verde Passage is also dubbed as **"the center of the center of the center of the world's marine shore fish biodiversity."**

This bill, which seeks to **declare the Verde Passage Marine Corridor as a Protected Area under the category of Protected Landscape and Seascape**, signifies the responsibility of the Philippine government not only to the Filipino people, but to the world as a whole.

It is the obligation of the Philippine government to protect this area not only for present and future Filipinos, but for the whole human race. Ensuring the sustainable development of Verde Passage Marine Corridor has **global environmental implications**.

A clean, healthy, productive, and beautiful environment is a vision that is as noble as it is universal. It is our heritage to our future generations, not only of Filipinos but of the whole world.

In view of the foregoing, the immediate passage of this Bill is sought.
