

Republic of the Philippines
HOUSE OF REPRESENTATIVES
Quezon City, Metro Manila

18TH CONGRESS
First Regular Session

HOUSE BILL NO. 0620

Introduced by Representative **CARLITO S. MARQUEZ**

EXPLANATORY NOTE

This bill seeks to amend pertinent provisions of Republic 7160, otherwise known as the “*Local Government Code of 1991*”. This is a re-filed bill in the 17th Congress and was mothballed by the Committee on Local Government.

The Environment and Natural Resources Management Office in every local government unit is very vital in formulating measures for the consideration of the sanggunian and in providing technical assistance and support to the governor or mayor, as the case may be, in carrying out measures to ensure the delivery of basic services and provision of adequate facilities relative to environment and natural resources services.

The Office establishes, maintains, protects and preserves communal forests, watersheds, tree parks, mangroves, greenbelts and similar forest projects and commercial forest, like industrial tree farms and agro-forestry projects. It also provides extension services to beneficiaries of forest development projects and

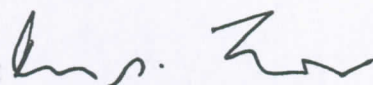

technical, financial and infrastructure assistance. It has also the primordial duty in managing and maintaining seed banks and in producing seedlings for forests and tree parks. By the same token, it provides extension services to beneficiaries of forest development projects and renders assistance for natural resources-related conservation and utilization activities consistent with ecological balance. It helps in promoting the small-scale mining and utilization of mineral resources, particularly mining of gold and acts as a regulator to the large-scale mining firms.

It is the overseer in coordinating with government agencies and non-governmental organizations in the implementation of measures to prevent and control land, air and water pollution with the assistance of the DENR. It is the front-liner in the delivery of services concerning the environment and natural resources, particularly in the renewal and rehabilitation of the environment during and in the aftermath of man-made and natural calamities and disasters. It is duty-bound to recommend to the sanggunian and advises the governor or mayor, as the case may be, on all matters relative to the protection, conservation, maximum utilization, application of appropriate technology and other matters related to the environment and natural resources.

We cannot downplay the vital function of the office to nation-building. However, when the Local Government code of 1991 was enacted, it bestowed for the optional appointment of an environment and natural resources officer in the province, city or municipality. This manifest error should be corrected. We must

consider that State should not just formulate the creation of Environment and Natural Resources Management Office for the provincial, city and municipal government as optional but rather be institutionalized as mandatory so that these offices would ensure that the tasks and visions for the provision of environment and natural resources development principles

Immediate approval of this bill is earnestly sought.

ENGR. CARLITO "Lito" S. MARQUEZ

Republic of the Philippines
