### EXPLANATORY NOTE

As stated in the Constitution, "[t]he State shall promote industrialization and full employment x x x through industries that make full and efficient use of human and natural resources, wherein our resources are not to simply utilized, but maximized to their full potential.

One resource that the country has in abundance, and may well serve as one of the cornerstones of economic growth, is metal. This bill is in recognition that the metal industry should play a vital role in the country's progress.

Right now, the mining industry is already one of the drivers of the economy. However, in order to uphold the mandate of the Constitution of full and efficient use of our resources, there is a need to press on with the development of our metal resources. The development of our metal resources needs to take a further step from the plain extractive and ore or raw material export orientation of the mining industry.

This bill entitled, "AN ACT CREATING THE PHILIPPINE METAL INDUSTRY CORPORATION, DEFINING ITS POWERS AND FUNCTIONS, PROVIDING FUNDS THEREFOR, AND FOR OTHER RELATED PURPOSES", is renewed government enterprise intervention in the development of our metal resources. It rests on the policy that the creation of an organized government corporate entity, or PHILMICO in this bill, is necessary to assure the full development and maximized utilization of the metal resources of the country.

PHILMICO shall be the government's corporate arm that shall engage primarily in metal processing, to ensure the availability of metal products in the country, at competitive cost. Government enterprise participation through PHILMICO will generate much needed revenue. The added value to our processed metals will boost our exports. The accessibility of processed metal in the country will create a downstream

metal industry and increase our participation in the value chain of international trade. Likewise, it will remove our dependence on importation of metal products for our other vital industries. A downstream metal industry will generate employment and spur domestic business activity.

Government should intervene in order to harness the full potential of the metal industry, and make it a foundation of growth. For this reason, the passage of this bill is urged.
