

Republic of the Philippines
House of Representatives

EIGHTEENTH CONGRESS
First Regular Session

HOUSE BILL NO. 2712

Introduced by Rep. Luisa Lloren Cuaresma
Lone District of Nueva Vizcaya

EXPLANATORY NOTE

Republic Act No. 7942, otherwise known as the Philippine Mining of 1995, provides for several ways by which mining companies can be granted mining concessions such as the Financial and Technical Assistance Agreement (FTAA) and the Mineral Agreement as stated in Sections 27 and 33 of RA 7942.

However, it is observed that these contracts are only entered into between mining company and the officials of the Mines and Geosciences Bureau, the DENR and the Office of the President. No legislative franchise is required of mining large-scale mining projects despite the fact that these projects have large-scale environmental impacts. Mining adversely affects not only the environment but the community where it is located. It would seem that the mining law was written to avoid the requirement of a legislative franchise to make it much easier for miners to avoid the scrutiny of the members of Congress and make the approval process for mining contracts easier to navigate.

As I have stated during my privilege speech sometime in August of 2016, "If the telecommunications industry, which does not cause too much environmental impact; which does not result in contamination of water sources; and which does not cause massive deforestation, requires a legislative franchise to operate, then with more reason that we should impose the same requirement to an inherently destructive industry like mining."

This bill is part of the legislative commitments and environmental advocacy of this representation and the present administration, meant to provide scrutiny for mining projects and protection of our environment.

With this, support for this measure is certainly sought.
