#### **EXPLANATORY NOTE**

After its eruption 1995, Mount Pinatubo which is situated in the Province of Zambales, redefined its physical appearance. The once fierce volcano is now host to a number of attractions that make it one of the most visited spots by both local and foreign tourists. In addition to the natural beauty exuded by the volcano, the rich soil is a veritable source of nutrient suitable for high value crops and other farm produce.

With these attributes of Mount Pinatubo, the issue of sustainability of the tourism and agricultural potential of the volcano comes to mind. As of today, little to none is being done not only to promote ecotourism in the area without disregarding the impact of human invasion in the rich ecosystem of Mount Pinatubo. It is also noteworthy to state that little to none is being made to ensure the practice of responsible agriculture in the area in order to harness the full potential of the rich volcanic soil of Mount Pinatubo.

This bill was filed during the 16<sup>th</sup> Congress, was approved by the House of Representatives on 3<sup>rd</sup> Reading and was transmitted to the Senate for consideration. However, it only managed to reach 2<sup>nd</sup> Reading in the Senate. In view of this, this bill is being refilled and proposes to declare Mount Pinatubo as an ecotourism zone that shall be governed by a composite body that will ensure the sustainability of the agri-ecotourist spot.

Immediate passage of this bill is earnestly sought.
