HOUSE BILL NO. _____

Introduced by **Representative Manuel Luis T. Lopez**

EXPLANATORY NOTE

According to the 2013 Functional Literacy, Education and Mass Media Survey ("FLEMMS") conducted by the Philippine Statistics Authority ("PSA") one in every ten or about 4 million Filipino children and youth were out-of-school in 2013. The study further showed that there was a higher proportion of persons who are out-of-school among the youth who are aged 15-24 years old. Also, according to the FLEMMS, the top 5 reasons why children and the youth do not attend school anymore are the following: (1) Marriage; **(2) Family income not sufficient to send the child to school;** (3) Lack of personal interest; (4) Housekeeping; **(5) High Cost of education.** This shows that there is a strong connection between the financial capacity and position of the student and his family in determining whether he/she will attain a college degree.

In another study conducted by the World Education News and reviews ("WENR") in 2014, for tertiary level education, there are a total of 2.02 million students enrolled in private schools while there are 1.54 million in public schools. With this great number of tertiary level students, providing them with additional discounts and benefits would greatly improve the quality of our student population as they will now be able to worry less about the financial expenditures for their school supplies and materials.

This bill, which was first filed in the 17th Congress and has been pending with the Committee on Basic Education and Culture since May 3, 2017, seeks to provide students and their families the necessary financial assistance by providing them with discounts with regards to all their educational related purchases. It also seeks to improve the quality of education in the Philippines by lessening the financial burden on the students and their families as well as making attending school more enjoyable and convenient.

In view of the foregoing, the passage of this bill is earnestly sought.
