EXPLANATORY NOTE

This bill seeks for the creation and construction of an alternate international airport to be located in the municipality of Medellin, Province of Cebu, Province of Cebu. The airport will serve as an alternate to the airport already existing and operational, the Mactan Cebu International Airport (MCIA). This is an answer to the requirement that every international airport should have an alternate one.

Each day, thousands of passengers, locals and foreigners alike take their flights at Mactan Cebu International Airport (MCIA). The number of flights whether domestic or international, inbound or outbound are increasing. Any disruption, however in the operation of the MCIA will undoubtedly cause great repercussion not only in the air transportation industry in Cebu but likewise in Cebu's economy. An alternate airport equipped with modern, state-of-the-art navigational equipments and facilities is necessary to be established in order to address contingencies in the air transportation system of MCIA.

The municipality of Medellin in the whole province of Cebu is geographically best suited as a site for the construction of an alternate airport. It has a vast area of flat land capable of addressing the requirements of an airport most especially the runway. Medellin is likewise situated in an area where it is just nearby to tourist destinations like the Bantayan and Malapascua islands. Medellin is easily accessible in the nearby provinces of Leyte, Masbate and Negros. The creation of an airport in Medellin will surely boost the tourism and economic activities not only in the northern Cebu likewise its neighboring provinces.

In view of the foregoing premises, approval of this bill is highly recommended.
