EXPLANATORY NOTE

The rationale behind the 1987 Constitution explicitly mandating for the State not only to make education accessible to all but also to uphold the right of citizens to quality education is the basic tenet that the purpose of education is to provide an individual with knowledge, skills, competence and desirable qualities of behavior to render him fit for the duties of life.

Pursuant to this expressed constitutional mandate, Congress enacted Republic Act No. 6655 otherwise known as the Free Secondary Education Act.

It is worthy to mention that our government has invested heavily in the education of our school children knowing fully well that investment in knowledge always pays the best interest. This can be gleaned from another provision in the Constitution mandating the State to give highest budgetary priority to education.

It is sad to note, however, that the purpose of the government to invest heavily in the education of our children in order to equip them with knowledge and competence to render him fit for the duties of life may just come to naught if they will not be able to pursue higher education.

The mass exodus of agricultural workers to shift to a high paying job in the urban areas or to even sell their farmlands in order to send their children to college or university has severely affected the government's desire to increase agricultural productivity.

It is therefore the paramount objective of this bill to cure this problem by

providing full scholarship grant to legitimate dependent children of farmers and fisher folks attending state college or university.

In view of the foregoing reasons, the approval of this bill is earnestly sought.
