EXPLANATORY NOTE

There is a need to improve the government's housing program in order to make available at affordable prices decent housing and basic services to poor and homeless families all over the country.

The acute housing problem compounded by indiscriminate squatting in the urban areas necessitates a forward-looking approach to answer this basic need of the people.

This bill seeks the declaration of all idle public lands that have remained idle and suitable for residential purposes so that they may be developed into socialized housing for low-salaried government and private employees and squatters. The National Housing Authority is proposed to take over the said idle public lands for development into a residential project to be reserved for the purpose.

I earnestly hope for the approval of this bill.
