EXPLANATORY NOTE

Fishing serves as the main source of food and livelihood for the people of Surigao del Sur due since its coastlines are bounded by the Pacific Ocean. The fast growth of the communities and the increasing demands of the aquatic products for trade have become a challenge to the present supply of our aquatic resources. This dilemma is in need for governmental intervention. The establishment of multipurpose aquatic breeding farms and hatcheries for the production of lobsters, shrimps, prawns and crabs present a practical and sustainable solution to this end.

The rearing of fry and fingerlings would be able to help in increasing the supply of the marine life. In turn, the replenished population of our shrimps, prawns and crabs will assist in the promotion of the livelihood of our fishermen and boost the trade of marine products in Surigao del Sur.

This Bill seeks to ensure that the Municipality of Barobo will become a center for this initiative through the establishment of a multipurpose fish breeding farms and hatcheries.

The approval of this Bill is earnestly sought.
