**EXPLANATORY NOTE**

Public-Private Partnerships are gaining ground all over the world in extending the ability of governments to provide key services in difficult economics by tapping private sector resources. In most countries, PPP contractual arrangements are aimed at overcoming public sector constraints such as lack of capital or lack of public sector capacity, resources and specialized expertise to develop, manage and operate infrastructure assets. PPPs are now commonly utilized to accelerate economic growth, development and infrastructure delivery — these ultimately result in quality service and overall good governance.

The Philippines recognizes the indispensable role of private sectors vis-a-vis PPPs. In fact, the country is one of the pioneers in private sector participation in major infrastructure projects in Asia. Republic Act No. 6957 otherwise known as the Built-Operate-Transfer (BOT) Law passed in 1990 was the first of its kind in the region. In 1994, Republic Act NO. 7718 amended the BOT Law and introduced new variants of private sector infrastructure or development projects. On 9 September 2010, former President Benigno S. Aquino III signed Executive Order No. 8, as amended by Executive Order No. 136, entitled "Reorganizing and Renaming the Build-Operate-and-Transfer (BOT) Center to the Public-Private Partnership (PPP) Center of the Philippines and Transferring its Attachment from the Department of Trade and Industry to the National Economic and Development Authority and for Other Purposes-". Executive Order No. 8 established the PPP Center to conduct project facilitation and assistance to implementing agencies in addressing impediments in the implementation of PPP programs and projects, among its other functions.

Despite these developments, the Philippines still lags behind other countries in providing public infrastructure. The massive pipeline of key infrastructure deals is a reflection of how much money the country needs to invest to improve the quality of life in the country. With this issue at hand, funding mechanisms for public-private partnership (PPP) contracts must be expanded.' In order to tap capital markets for

infrastructure financing. there is a need to enact amendments to the existing BOT

This re-filed version of the bill takes inspiration from House Bill No. 6331 filed during the 16th Congress. It intends to update and replace the BOT Law by incorporating the valuable lessons learned from successful and failed projects in the past, as well as global best practices in PPP. It further seeks to accelerate public infrastructure development by strengthening the PPP institutional framework: providing financial and technical support through the Project Development and Monitoring Facility (PDMF); optimizing project risks and obtaining government support; expanding the PPP contractual arrangements; providing for transparent and competitive bidding; setting standard contents and implementation of PPP projects for transparency, consistency, and predictability; and granting incentives to PPP projects

Moreover, it recognizes and strengthens the autonomy Of local government units to enter into PPP contractual arrangements. There is a need to arm the LGUs with technical expertise to properly prepare, monitor and implement PPP projects at the local level\_ A report by the Asian Development Bank (ADB) noted that many LGUs encounter snags in implementing PPP projects related to infrastructure, power generation and bulk water supply in their respective communities because of the lack of technical and financial resources to carry out these initiatives.

President Rodrigo Roa Duterte himself stated in his 10-point socio-economic agenda that Public-Private Partnerships play a key role in promoting economic and social development and accelerating annual infrastructure spending to account for 5% of gross domestic product (GDP).

Thus, the immediate approval of this bill is earnestly sought
