**EXPLANATORY NOTE**

In light of the fact that no government agency undertakes a conscious monitoring on how pension funds under the care of the Social Security System on the one hand and by the Government Service Insurance Service on the other are being administered, it behooves a cognizant entity to adopt a proactive approach as would insure that state pension funds are carefully invested at no risk whatsoever on either SSS or GSIS against losses or the possibility that such funds are being siphoned off to benefit private sector entities.

Toward this end, the Bangko Sentral ng Pilipinas or the Monetary Board, as the case may be, shall issue rules, regulations, guidelines and other sanctions as it may see fit that will introduce a culture of transparency in the business or corporate affairs of both the SSS and the GSIS.

There shall be an internal system of disclosure initiated by the state pension fund itself for the full dissemination and information as regard how substantial chunk of funds may be utilized for all their bonafide members and stakeholders. Not surprisingly, SSS or GSIS is awash with cash but this shall not lend freedom for them to invest in anyway they see.

It is of paramount consideration that pension funds are contributed by private and public workers in the SSS and GSIS, respectively and therefore, it is only fitting and proper that serious custodial job is reposed upon those that manage these pension funds. In no permissible instance must management provide any part of the pension funds to buoy up or resuscitate an otherwise ailing private or public entity.

Pension funds must accrue only to their legitimate contributors, no one else.

It is the intention of this bill to ensure that pension funds are not being siphoned off for purposes other than the higher interest of its contributors, hence the immediate passage of this proposed bill is most earnestly sought.
