3854  
HOUSE BILL NO. \_\_\_\_\_

---

Introduced by Representative **TYRONE D AGABAS**

---

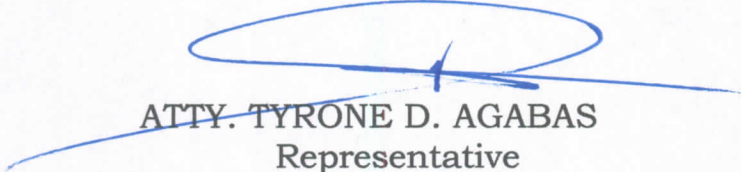

**EXPLANATORY NOTE**

This bill which seeks to require each graduating elementary, high school, and college student to plant at least ten (10) trees as a pre-requisite for graduation has already been approved by the House of Representatives on its 3<sup>rd</sup> and final reading in the 17<sup>th</sup> Congress. On account of the bill's importance in our battle against climate change, this bill is being filed.

Today, the biggest threat we face is climate change. It is real as the rise in global temperature over the last decade is now a concern of every government worldwide. If one may ask, is it bad? The answer is no. It is worse. Unlike decades back, no political candidate in the country can now run a house to house campaign at 1:00 in the afternoon without getting fried in the open. It is now becoming hotter and drier every year. Even the sea level is now rising up as a result of global warming, not to mention extreme flooding in recent years. If we will allow climate change to run unchecked, there won't be much of us left in the future. The issue is survival. There is a need for us to individually and collectively adapt measures which can mitigate the effects of climate change or global warming.

One such measure is to require everyone to plant a tree. In this legislative measure, all graduating students from elementary to college will be required to plant at least ten (10) trees as pre-requisite for graduation. With millions of graduating students each year, we are looking forward to equivalent number of trees planted per year. This is one way of requiring everyone to actively participate in mitigating the growing effects of climate change. This is one step forward for our survival.

In view of the foregoing, the approval of this bill is earnestly sought.
