**AN ACT
REQUIRING GOVERNMENT AGENCIES TO INDICATE
THE BLOOD TYPE OF INDIVIDUALS IN THE IDENTIFICATION
CARDS, CERTIFICATES AND LICENSES**

EXPLANATORY NOTE

The 1987 Constitution states that "The State shall protect and promote the right to health of the people and instill health consciousness among them." (Section 15, Article II)

The government therefore, is mandated to enhance and intensify its programs concerning health and health care in the pursuit of this policy.

Near fatal injuries resulting from accidents and in some cases from violence require immediate emergency response. With that, a victim's identity and other information is imperative which can only be obtained from his or her identification card. Normally, identification cards particularly those issued by the government usually contain the name, address, person to be notified and other relevant information of the cardholder. Most often, the blood type is not included.

In cases, where the cardholder was victimized by an accident or violence that resulted in a heavy loss of blood, survival will depend, aside from other medical treatment, on blood transfusion. As such, immediate identification of the person's blood type is very important to the person's survival.

The proposed measure therefore, seeks to prevent any delay in blood transfusion by requiring government offices to include in their identification cards information on the holder's blood type.

Owing to the importance of this measure, this was approved on third reading in the 16th Congress, and we fervently hope that this current Congress will finally enact the same.
