HOUSE BILL NO. 3596

**Introduced by Representative Sharon S. Garin**

#### **EXPLANATORY NOTE**

The Food and Agriculture Organization (FAO), suggest that the Philippine agriculture sector is aging as senior and middle-aged farmers find it harder and harder to pass on their work to young people who find farming tedious, unsustainable and unglamorous compared to other jobs.

According to recent studies by the STI Education Services Group Incorporated, the average age of farmers in the Philippines is 57 years old. This is alarming as it foreshadows a future agricultural labor shortage, which can lead to serious food security and sustainability issues, this on top of other issues like climate change, urbanization and the growing consumption of the country.

Data from the Philippine Statistic Authority show a dwindling share of agricultural employment out of the country's total number of laborers. As of April 2017, agricultural workers comprise just 26.1% of the labor force, from a high of 32.4% in 2006, and 41.7% in the 1997.

Majority of the youth are simply not inclined to pursue a career or business opportunities in the agricultural field. This is clearly evident in the decline in enrollment of agriculture-related courses in colleges and universities.

This bill seeks to rectify the issues above by providing an institutionalized scholarship program for agriculture and fisheries courses in State Colleges and Universities (SCUs) as well as Private Education Institute. The bill also provides for support of agri-business and agri-entrepreneurship endeavours of the youth. Through this we hope to impart to the youth enough incentives and inspiration to plant more seeds, both literally and figuratively, for a more vibrant and youthful future of our agricultural sector.

In view of the foregoing, the passage of this bill is earnestly sought.
