EXPLANATORY NOTE

The latest trend in information technology particularly in the field of telecommunications is greatly felt on our country. Almost every Filipino nowadays, own and use cellular phones. With the use of this instrument, business transactions as well and everyday living have become more effective and efficient. One reason that may be attributed to the popularity of cellular phones among us Filipinos is the system of text messaging that earned us the moniker the texting capital of the world.

However, majority if not all cellular phone owners prefer to use the pre-paid subscriber identity module (SIM) card. Not only is this prepaid subscriber identity module (SIM) card easily accessible, i.e., it can be bought almost everywhere, the owners thereof can likewise easily evade detection since prepaid SIMs are virtually undetectable. Due to this, unscrupulous individuals almost always take advantage of the same in the pursuit of their criminal activities to the detriment not only of a particular interest but that of the whole nation.

The proposed bill thereof seeks to address the above-mentioned problem being brought about by the proliferation of pre-paid subscriber identity module (SIM) card. It provides for a system of regulating the sale and/or disposition of pre-paid SIM cards. And also puts into place the procedure to be followed if a member of the law enforcement agency and/or officer would like to retrieve information concerning the owner of a pre-paid SIM card that had been used in a criminal or illegal activity without prejudice to the rights of the registered owner under existing law. With this in mind, it is hoped that the proposal would contribute in one way or the other, in providing solution to our recurrent peace and order problem.

Every new technology carries with its tremendous responsibility. The technology should be used for the advancement of the interest of all and not only of a chosen few. It therefore becomes our imperative duty as lawmakers to ensure that the benefits we derive for this technology should be used properly and not abused by some segments of our society.

It is for this reason and the advancement of the common good that early passage of this bill is earnestly sought.
