House Bill No. 4661

EXPLANATORY NOTE

Our environment has been the object of abuse, neglect and unconcern for many decades. It is only now that some attention and care is being extended to our environment and in most cases on a sporadic basis.

Considering the present state of our environment, to be effective and meaningful, efforts to rescue our environment from its present degradation should be massive and sustained. The mandate to care for our environment should not only be compulsory. It should also contain incentives.

In other more socially advanced and environment-conscious countries, one day of every year is declared Environment Day. On this day, every year, everybody is expected to participate in environment care activities, such as cleaning the streets, the surroundings, fences, sidewalks, beaches, rivers, riverbanks and all other areas which need cleaning.

In the Philippines, because of the sad state of our environment, we need many more days to be devoted to our environment. This bill proposes to make the last Saturday of every month Environment Day.

I earnestly invite my colleagues to support this bill.
