**EXPLANATORY NOTE**

Article II Section 15 of the 1987 Constitution provides that the State shall protect and promote the right to health of the people and instill health consciousness among them. Despite such policy, efforts on the part of the government remain inadequate especially in light of the soaring number of Filipinos afflicted with disabling and costly diseases such as diabetes.

Dubbed as a silent killer, diabetes is among the leading causes of mortality in the Philippines. Over time, diabetes can lead to heart and blood vessel disease, blindness, kidney failure, and foot ulcers among other conditions. It is expected that over seven (7) million Filipinos will have diabetes by 2030. Furthermore, diabetes awareness is low among the public.

It is in this light that this bill seeks to promote a different approach in responding to this illness. This measure requires the Department of Health (DOH) to establish an advisory group to examine and recommend best practices of diabetes and chronic illness employee wellness incentivization and disease management programs; to prepare, biennially, a diabetes report card for the nation that: (1) is adaptable by state and local agencies in order to rate or report local diabetes care, costs, and prevalence; and (2) includes trend analysis in order to track progress in meeting established national goals and objectives and to inform policy and program development; to conduct, support, and promote the collection, analysis, and publication of data on the prevalence and incidence of type 1 and 2 diabetes and of pre-diabetes; and to improve diabetes mortality data collection. It is hoped that the passage of this measure shall put a halt to this fast-growing pandemic and shall bring about a healthier diabetes-free population.

In view of the foregoing, approval of this measure is earnestly sought.
