

Republic of the Philippines
HOUSE OF THE REPRESENTATIVES
Quezon City

EIGHTEENTH CONGRESS

First Regular Session

1545
HOUSE BILL No. _____

Introduced by REPRESENTATIVES ALFREDO A. GARBIN, Jr. and
ELIZALDY S. CO

EXPLANATORY NOTE

This bill seeks to make the appointment of a municipal agriculturist mandatory in agricultural municipalities while optional in cities and other municipalities by amending the Section 482, Republic Act No. 7160 Local Government Code. By making the office of the municipal agriculturist mandatory, the needs of the farmers, fishermen, and local entrepreneurs in agricultural municipalities are addressed.

The Local Government Code devolved to local government units the functions and responsibilities of national agencies and offices where such basic services and facilities include, among others, agricultural support services to barangays, and agricultural extension and on-site research services and facilities in municipalities and provinces. The devolution also includes the transfer to local government units of the records, equipment, and other assets and personnel of national agencies and offices corresponding to the devolved powers, functions, and responsibilities. (Section 17, RA 7160)

However, while Philippines is primarily an agricultural country and agricultural services is one of the basic services for local government units, agriculturists in every municipality is only optional under the Local Government Code. The mandatory appointment of an agriculturist in provinces is not enough for the useful distribution of agricultural and other related services.

The devolution of services under the Local Government Code hampered the delivery of agricultural services to the farming community because of the lack of available agriculturists in agricultural communities in municipalities, whose appointment are only optional under the Local Government Code. As a result, agricultural municipalities are not supported by an effective extension capacity because of the lack or absence of agricultural experts and personnel. This has greatly affected the production and service of the farming communities.

It is not only proper but also favorable to require agriculturists in agricultural municipalities who can provide technical information and special services to farmers in order to improve quality and yield of crops and livestock.

In light of these circumstances, the swift passage of the bill is earnestly sought.

ALFREDO A. GARBIN, Jr.
