House Bill no. **3033**

---

**Introduced by Representative Alfred Vargas**

---

The number of mobile phone users in the Philippines is expected to reach 75.6 million by the year 2020, and is continue to rise. This means that in one click of a hand, more information is being shared in an unregulated manner or not supervised by existing regulations or laws.

The continuous rise in mobile phone users translate to a high number of untraceable Subscriber Identity Module (SIM) card, which are readily available from direct retailers without any form of documentation procedure or proof of identity requirements. Anonymity could then lead to bullying or harassment, criminality, acts of terrorism, and other modus operandi. It is high time that we establish a registration mechanism that will regulate the sale of SIM cards to prevent illegal acts, as mentioned above.

Through this Bill, consumer interest and public protection will be in place. Law enforcement agencies and the National Telecommunications Commission (NTC) should then work hand-in-hand to advance the right to privacy of the registered mobile subscribers.

This proposed measure should also enable to provide consumers in maintaining their mobile numbers, as it is registered under their name and they hold proof of ownership for this effect.

The version of this Bill has already gathered the approval of the Committee on Information and Communications and was passed on its third reading during the 17<sup>th</sup> Congress.
