EXPLANATORY NOTE

This bill increases the authority and power of the Bureau of Fisheries and Aquatic Resources by elevating it to the level of a Department. Considering that the fisheries and aquatic resources sector has a significant potential in contributing more to the economy, this bill further empowers the office that has the power and authority to develop, conserve, manage, protect and utilize the country's fisheries and aquatic resources.

While agricultural crops is the primary contributor to the country's Gross Domestic Products (GDP) in the Agricultural sector, it cannot be denied that the Philippines is an archipelago and its marine resources come from 2,200,000 square kilometers (849,425 sq mi) of territorial waters and its inland waters amount to 1.5 million hectares.

In 2010, the Philippines was the world's third principal producer of aquatic plants and the tenth producer of fish, crustaceans, and mollusks. The country's production constitutes 3.06% of the total world production of 168.4 million metric tons.

In 2011, the fishing industry's contribution to the country's GDP were 1.9 % and 2.2% at current and constant 2000 prices, respectively. This translates to some P183.1 billion for current prices and P130.77 billion for constant prices of the country's GDP of P9,735.52 billion (current prices) and P5,924.4 billion (constant prices). The industry also accounted for 14.7% (P183.1 billion) and 19.2% (P130.77 billion) of the Gross Value Added (GVA) in Agriculture, Hunting, Forestry and Fishing Group of P1,245 billion and P680 billion at current and constant prices, respectively, the largest share next to agricultural crops.

This legislative measure is pursuant to the Philippine Constitution which states under Article XIII Agrarian and Natural Resources Reform, Section 7:

The State shall protect the rights of subsistence fishermen, especially of local communities, to the preferential use of the communal marine and fishing resources, both inland and offshore. It shall provide support to such fishermen through appropriate technology and research, adequate financial, production, and marketing assistance, and other services. The State shall also protect, develop, and conserve such resources. The protection shall extend to offshore fishing grounds of subsistence fishermen against foreign intrusion. Fishworkers

shall receive a just share from their labor in the utilization of marine and fishing resources."

In view of the above circumstances, the swift passage of the bill is earnestly sought.
