HOUSE BILL NO. 543

**EXPLANATORY NOTE**

This Bill is a proposed legislation filed by the author during the 15<sup>th</sup> Congress in 2010. For decades eye diseases have been a priority concern because of the gradual increase of cases being treated in various eye clinics and hospitals due to aging population, improper eye care, and complication from other diseases, environmental factor, accidents and other related factors.

Yet the more common eye diseases are, to a great extent, preventable, and curable with early and adequate medical care, prompt and intensive prevention and health education programs.

Hence there is an urgent need to consolidate and reinforce existing programs, strategies and efforts at preventing, treating and rehabilitating people affected by eye diseases and to undertake research and training on the cure and prevention of eye diseases, through the National Eye Center which will house and nurture the above and related activities and provide tertiary-level care for more difficult and problematic cases.

In view of the foregoing considerations, approval of this bill is highly and earnestly recommended.
